## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, filed 08/27/08, with respect to the rejection(s) of claim(s) 6, under 101 have been fully considered. Therefore, the rejection has been withdrawn including the allowance of claims 1-5. However, upon further consideration, a new ground(s) of rejection is made in view of below submitted office action.

### *Claim Rejections - 35 USC § 101*

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claim(s) 1, 5 and 6 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent<sup>1</sup> and recent Federal Circuit decisions<sup>2</sup> indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or

thing. While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. For example claim 5, having a process completed program step, but lacks utility.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform to current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. There are numerous antecedent basis problems and indefiniteness problems with the claims as currently written. For example, it is unclear in claim 1, 5 and 6 as to how many procedures are claimed. In particular, the claimed limitation as indicated in all independent claims, such as "specified specifies the procedures" are not clearly distinguished or defined in the claims, and also it is unclear from the claimed language of claim 1, 5 and 6, in way one skilled in the art would have clearly understood the claimed invention in the scope with that applicant (s) regard as invention.

Therefore, claims 2-4 are also rejected for being dependent on the rejected claims 1, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

***Allowable Subject Matter***

6. Claims 1-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, and U.S.C. 101, as set forth in this Office action.
